ESG

We have been actively caring for the common good since 1950

- CO_2 reduction policies
- Rainwater collection network
- Recycling program
- 75% energy autonomous
- Gender equality
- Zero tolerance discrimination policy
- Code of Ethics
- Charitable actions

Major advantages

- Reliable partner since 1950
- Wide product range
- High product availability
- Low customer lead times
- Courteous service for the entire supply chain
- Efficient distribution network
- Adaptive to new market needs and challenges

Wide product range and high product availability. As a key strategy, the company targets to offer an extended variety of high quality products to its customers from selected domestic and worldwide territories, while balancing the best quality to price trade-off.

Adaptive to new market needs and challenges. Our multiannual presence in the highly competitive supply chain of the food industry, allows us to adapt on time to the changing requirements of the international market.

Flexible on custom products. While our main business operations are related to trading a wide range of products in bulk, mixed pallet loads, mixed container loads or even shipments directly from origin, we are also flexible on designing custom retail or food service products. That means that under certain agreements, we can undertake special processing and packaging projects tailor-made upon customer's preferences (MOQ's may apply).

Low customer lead times. We always strive to satisfy each particular customer in terms of anytime product availability offering a highly courteous and reliable service with short lead times.

High quality-safe products. Following a series of carefully designed steps, our firm implements a well detailed procurement process, a thorough quality inspection upon delivery of raw materials, a certain production process with up-to-date equipment (Colour sorting, X-Ray scanning, Metal detectors) and finally a highly reliable delivery. Our company is certified accordingly to BRC, ISO 22000, FSSC 22000, Kosher and Halal standards.

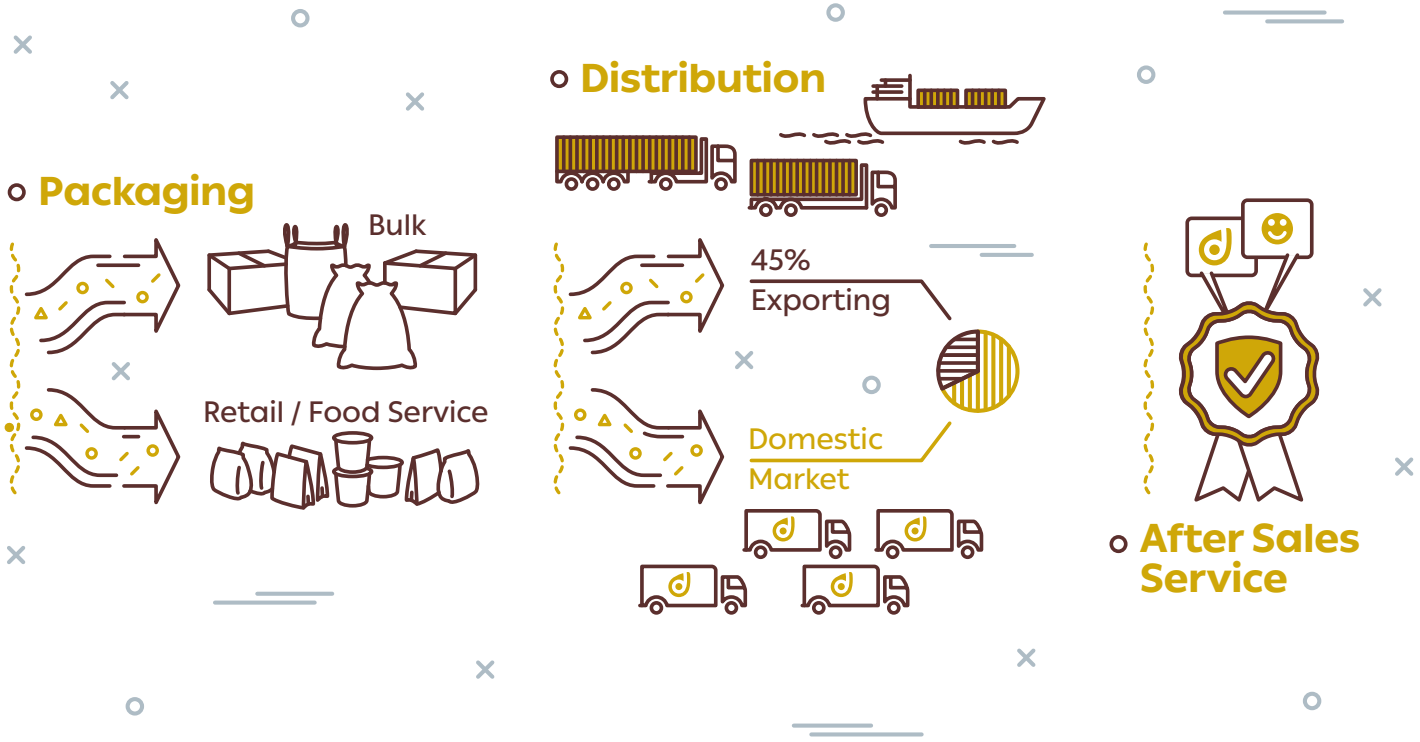
Reliable partner since 1950. We strive to build long term, strategic partnerships. Our firm has export activity in 58 countries inside and outside the EU, focusing in keeping every single customer truly satisfied.

The dry food journey

Sourcing from 75 countries
We carefully choose our partners from all over the world based on their ability to fulfill our highly demanding qualitative criteria.

Quality Control
The receipt of the goods takes place after being evaluated under scrutiny, through our quality control department, according to the international standards of ISO & BRC.

Logistics
Our products are being handled and stored in booths of controlled temperature and humidity, and they are being transported through our privately-owned trucks or through a network of certified partners.



Processing

Our processing lines include colour sorting, X-ray scanning, roasting, frying, coating, grinding and packing. By using state-of-the-art machinery, we are committing to deliver high quality products to our customers.

Packaging

We can easily adapt to client needs and we can offer multiple packaging options, with a wide range of shaping and sealing, in high volumes. From customized food-service bags, to branded products and premium packaging for the retail industry.

Distribution

Our exporting activity represents 45% of our overall sales volumes, while the rest is being absorbed by the domestic market. In both cases we take in charge of our clients' orders, which we monitor till they are being delivered. We maintain long-term business relationships with our customers, being a reliable partner with whom they can discuss how the market evolves before and after their order.
